

Certified Radiology Administrator – CRA

Validated Knowledge in Imaging Administration

Finding the right talent to lead your medical imaging department can be a challenge. In a sea of degrees, experiences and qualifications, **CRA-credentialed professionals give you an edge.**

CRA Knowledge Areas

The Certified Radiology Administrator (CRA) credential is an exam-based certification tailored specifically to medical imaging administration. When you hire a CRA, you are hiring a professional with tested, proven knowledge and excellence in:

- human resource management
- asset resource management
- fiscal management
- operations management
- communication and information management

In short, the CRA credential verifies the **specific knowledge and skills you need to lead your imaging team.**

CRA Requirements

- Candidates must submit an application satisfying professional **experience and education** requirements.
 - Successful applicants must pass a challenging examination testing the skill set crucial to **quality imaging management.**
 - Once earned, the CRA credential must be **renewed every 3 years** through a minimum of 36 contact hours of continuing education studies in the 5 domains tested on the CRA examination.
-

CRA Adds Value to Your Organization

CRAs have proven, tested:

- Validated high-level **experience**
- Advanced understanding of the **principals** of the imaging business
- Demonstrated ability in **the specific skills** you need in your imaging management team
- Certified high standards of **achievement**

Including the CRA as a desired candidate quality in job descriptions, **sets a higher standard for healthcare organizations and patients**, and makes a statement that tells employees and patients alike that **your organization strives to be the best so you can offer the best care possible.**

Seek a CRA certified individual and find the *right* talent for your organization.
